

## Arizona Mine Reclamation L.L.C.

### Level 6

#### **Vertical (shaft), Horizontal (adit)**

**Level 6** is classified as a warning system and not classified to provide any access restrictions.

- **Level 6V - (Shaft)** – Construction consists of installing a 4 strand barbed wire warning fence around shaft opening. Warning fence is to be set back a minimum of 4 feet from shaft edge. Standard 6 foot metal “T” posts are to be used with a maximum distance between posts not to exceed 8 feet without fence stays or maximum distance between posts not to exceed 12 feet with fence stays (minimum 1 fence stay per 12 foot distance – recommend 2 fence stays at 4 feet from posts). Corner posts are to be down guyed anchored to at minimum #8 rebar placed at least 16 inches in ground at 45° angle away from fence post and wire tied to corner post. Top wire will not to exceed 4 feet in height from ground level. Opening between the four barbed wire strands will not exceed 1 foot. At least 1 warning sign per site or 75 linear feet of fence line. Warning sign shall be specified and/or provided by contracting agency.

- See Accompanying **Level 6V** Vertical Shaft Draft •

- **Level 6HA - (Adit)** – Construction consists of installing a 4 strand barbed wire warning fence around shaft opening. Warning fence is to be set back a minimum of 4 feet from shaft edge. Standard 6 foot metal “T” posts are to be used with a maximum distance between posts not to exceed 8 feet without fence stays or maximum distance between posts not to exceed 12 feet with fence stays (minimum 1 fence stay per 12 foot distance – recommend 2 fence stays at 4 feet from posts). Corner posts are to be down guyed anchored to at minimum #8 rebar placed at least 16 inches in ground at 45° angle away from fence post and wire tied to corner post. Top wire will not to exceed 4 feet in height from ground level. Opening between the four barbed wire strands will not exceed 1 foot. At least 1 warning sign per site or 100 linear feet of fence line.
