

# Arizona Mine Reclamation L.L.C.

## MISSION STATEMENT

Arizona Mine Reclamation L.L.C. was founded on an idea that both State and Federal agencies could greatly benefit from a cost effective purpose driven solution to abandoned mines within Arizona. Arizona Mine Reclamation L.L.C. was formed with three members; President Julie Owen; Sr. EVP John Owen; and EVP George Hoover. The three principle members are responsible for managing and working on all projects and sharing in the day to day company operations. Arizona Mine Reclamation L.L.C.'s primary goal is centered on safety for the citizens of Arizona, protecting its wildlife resources, and promoting a healthy environment.

We are looking to partner with local suppliers to bring products and services together in the most cost effective manner possible in this unique work environment. Required project materials have a significant impact on cost structure to a project and as a result have a significant impact on the final design and sites chosen for reclamation. Thru this local partnership we intend to seek donations of materials from local suppliers and intern provide these donations back to the State or Federal agencies as donations from the local supplier.

Arizona Mine Reclamation L.L.C. is working with the Arizona State Mine Inspectors office (ASMI), Arizona Game and Fish Department, Bureau of Land Management (BLM), National Forestry Service, Arizona Department of Agriculture (ADA), Arizona Department of Mines and Minerals Resources, and Bat Conservation International Inc. (BCI). With so many agencies and such a wide range of site work requirements Arizona Mine Reclamation L.L.C. has put together this booklet that we commonly refer to as the "ARIZONA MINE RECLAMATION LEVELS OF PROTECTION". This booklet is an evolving design structure that with all of our concerted efforts we hope to make into an industry standard both in design structures and terminology. We know there are a lot of good ideas and techniques currently at work and new and better ones to be found and as a result we hope to change, modify, and update these levels of protection as we work together.

It is our policy at Arizona Mine Reclamation L.L.C. not to communicate job activities with any entity or persons other than the Arizona State Mine Inspectors office and/or the contracting agency.

Our motto says it all

**"SAFETY is our reason for doing what we do - Make it your reason for staying away"**

**STAY OUT! STAY ALIVE!**
